Why are we not free in this country anymore? Our for fathers are tunring over in their graves everyday with the way this country is being run. Everyday you turn around someone wants to take this freedom away or that freedom away if I do not want to watch something or listen to something all I need to do is turn the channel. You want to crack down on the talks shows and other TV programs what about the soap operas that have been on TV for Years showing this person in bed with that person maybe you need to look at that stuff more then other things that people do in their everyday lives.

Maybe the NAB needs to have their people improve their programs and service so people would not want to stop listening to AM/FM
